In a one-off plenary assembly held today, GxF and PSOE cabinet members overcame the "no" votes of Sa Unió representatives in the opposition to obtain the maximum legal coverage to maintain beach services on Formentera. Councillors agreed to ask for reports from the technical services of the Formentera Office of Environment, Consell de Formentera legal services and Dr. Avel·lí Blasco Esteve, professor of administrative law at the University of the Balearic Islands (UIB).

"Formentera's beach services are crucial", said Antoni Tur, Councillor of Environment, "they help maintain the image that tourists have of the island and they keep beaches clean and safe, not to mention their social importance for islanders, so we are seeking the maximum legal coverage, and the highest level of security to provide guarantees to companies and people involved in this process and also to the administration".
