

Nine individuals receiving care at the island's dependent care facility, together with three monitors and a host of personnel from Formentera Divers, headed to the sea today to get a closeup look at meadows of posidonia sea grass.

The outing included a boat ride through ses Salines park, a swim in es Freus marine reserve and, for all those who rose to the challenge, snorkeling over posidonia meadows, an experience that came with sightings of numerous fish and native underwater species.

The experience lasted a full day and offered users of Formentera's Centre de Dia the chance to take in neighbouring underwater surroundings. The event was organised by the Council's social welfare office and Formentera Divers diving centre.
