

Faced with the ongoing developments around Covid-19, one repercussion of which was the proclamation of state of alarm included in Royal Decree 463/2020 of 14 March, the Consell de Formentera reminds residents that beaches, children's parks and recreational spaces on the island are currently closed.

Over the weekend, local law enforcement began sealing off and posting signage in these areas to remind islanders of the closures. As announced to Formentera businesses and residents on the first day, violation of the imperative can carry anything from minor to more serious fines.
