

The Consell de Formentera Lifeguard Service, part of the Formentera Office of Interior, has led an educational push to inform tourists and residents about conditions at beaches during the swimming season, 1 May to 30 October. The status of Formentera's beaches will be updated daily at 11.00am at www.platgesdebalears.com.

The Consell has printed posters in Catalan, Spanish and English with a QR code that redirects to this website. The aim is to offer tourists and residents a resource where they can find out about the weather, jellyfish and available beach-front services, including lifeguard and safety facilities, as well as information about each area.

These posters can be found on the websites of the Formentera Office of Tourism (formentera.es) and the Consell de Formentera and at tourist information points. They will additionally be made available to the ferry companies and local hotels and restaurants.
