

The Formentera Council has announced that from today overflow parking will again be made available in la Savina between plaça Illes Pitiüses and Estany des Peix. Privately-owned vehicles can be left at the 120-capacity car park for up to five days and no special passes are required of drivers.

As part of a deal struck by the Council and the plot's current renters, the space will remain open until October 31. Neither lorries nor unhired rental cars can be left there. The free-to-use car park was made available in response to requests from residents and seasonal workers who lacked the necessary authorisation to park in la Savina. It is also open to tourists.
