

The Formentera Department of Mobility is pleased to announce a new map to encourage two-wheel mobility on the island among visitors. *Metrominut Formentera, better by bike* highlights eight bicycle routes near the port of La Savina, including details about their distance and the time it usually takes to travel them.

Mobility chief Rafael González said FDM would deliver the map to bike rental outfits in La Savina, Es Pujols and Sant Ferran so they could quickly explain to customers “just how easy it is to get around Formentera with environmentally sustainable vehicles”.

The map will also be accessible on the website of Formentera’s Office of Tourism and available locally at Tourist Info Points. The initiative is included in Formentera’s Sustainable Mobility Plan.
