

The Formentera Office of Mobility reports that new rates for authorisation to bring, drive and park cars and motorcycles on Formentera during the 2022 enforcement period of formentera.eco, 15 June to 15 September, both inclusive, have now taken effect.

Visitors bringing vehicles to the island can obtain accreditation in a few simple steps on www.formentera.eco

. The daily rate for cars is €3, with a minimum payment of €15; for motorcycles and motor scooters it is €1.50/day and €7.50 minimum. "This year we have tripled the fee compared to last summer. Between this, and the minimum day-tripper rate of €15, we have managed to deter single-day visitors from saturating Formentera roads in the high season", explained Rafael González, Councillor of Mobility.

Residents pay no charge for accreditation, but must sign up on the website. Cars authorised for blue zone parking and private vehicles of residents who pay the local road tax will be automatically accredited. Drivers must enter their vehicle plate number on www.formentera.eco to determine whether the accreditation has been properly secured. In the days ahead the Consell will launch a communication campaign encouraging Formentera residents to register their vehicles and obtain accreditation.

Hybrid vehicles are eligible for a 50% discount, electric vehicles 100%, and residents of Eivissa, Mallorca and Menorca have free accreditation.
