

The Formentera Department of Sport went public today with its lineup of activities and initiatives planned for 2020 as part of programme to promote sportsmanship and values-based play. Cosponsored by the Govern balear and Formentera’s local government, ‘Posam Valors a l’Esport’ (Let’s Put Values in Sport) aims to promote activities, training and outreach around the principles and positive attitudes inherent in sport.

According to the island’s councillor of sport, Paula Ferrer, this year’s programme will go beyond underscoring the need to defend such principles, and “get families of sportspeople involved, making activities more participatory and inclusive”. “Physical activity is an instrument of integration, in our relationships and for families. So Formentera is on the hook to promote social and educational values”, she said. The councillor also ran through some of the activities on the horizon this year. The Aula del Futur (Classroom of the Future), for instance, is an “innovative and interactive space” promoted by the Department of Sport and conceived as a “gathering place and a place of learning”. Then there are the open days scheduled at the municipal pool from Saturday 22 February. Or distribution of 750 reusable bottles among participants in municipal camps and members of local sport clubs.

Aula del Futur

Now under construction at the local resource centre for teachers (CEP), the Aula del Futur is a multi-disciplinary classroom equipped with computers, videos and screens where school-age sportspeople can share knowledge and take sportsmanlike values even further. Current plans put the classroom’s opening before the end of the 2019-2020 school year.

Open days at the municipal pool

The action begins this Saturday at 10.00am with an open day at the local swimming pool—a free event designed to get island families with children of all ages involved in diving, aquatic games and an array of other activities. Additional open days are scheduled 21 March, 25 April and 23 May.
