

Thursday January 24 the Govern's director general of energy, Ferran Rosa, together with CiF environment councillor Daisee Aguilera, will talk about the newest round of assistance for everything from solar, photovoltaic and small-scale wind turbine technologies through to electric mobility. Geared towards islanders and specialised businesses alike, the gathering is scheduled to take place at 7.30pm in the conference space of the island's dependent care facility (Centre de Dia).

The initiative is aimed at promoting clean energy and "self-consumption" (when the person or entity using the energy is the same one that produced it) and is coordinated by the Govern balear's directorate general of energy and climate change, an offshoot of the regional ministry of land, energy and mobility.

Details about the assistance can be found in Catalan at the following links:

1) Installations of solar panel- and "micro" wind turbine-based technologies for self-consumption at homes and businesses

<http://www.caib.es/govern/sac/fitxa.do?codi=3628364&coduo=2390767&lang=ca>

2) Purchases by taxi and ride-hailing service drivers of new vehicles harnessing special electric, plug-in hybrid electric, liquid petroleum gas (LPG), compressed natural gas (CNG) or reduced emission technologies

<http://www.caib.es/govern/sac/fitxa.do?codi=2319379&coduo=2390767&lang=ca>

3) Installation of public fast charging stations for electric vehicles (group packages)

<http://www.caib.es/govern/sac/fitxa.do?codi=3610334&coduo=2390767&lang=ca>

4) Installation of public fast (and "semi" fast) charging stations for electric vehicles (for individuals)

<http://www.caib.es/govern/sac/fitxa.do?codi=3610427&coduo=2390767&lang=ca>

5) Installation of private charging stations

<http://www.caib.es/govern/sac/fitxa.do?codi=3629421&coduo=2390767&lang=ca>

Councillor Aguilera said islanders who come to Thursday's session will “know how to benefit from funding to keep promoting renewable energies on the island”. She highlighted an array of funding options, including money so private businesses can install charging stations to further sustainable mobility.

A total of €1.8 million in funding is available for the four islands of the archipelago, a portion of which is put up by the European Regional Development Fund (ERDF). Applicants are eligible for reimbursement of 40 to 50 per cent (applications must be received by March 29 and work must be complete by September 20, 2019).

**Who is eligible for the funding:**

a) Small and medium-sized businesses.

b) Non-profit organisations and business associations which operate and are headquartered in the Balearic Islands.

c) Individual homeowners and homeowners' associations who oversee installations in dwellings or other facilities in the Balearic Islands.

**How much funding is available:**

a) Businesses, business associations and non-profit associations can receive 40 per cent back on installations of photovoltaic- and small-scale wind turbine-based technology.

b) Individual homeowners and homeowners' associations can receive 50 per cent back on installations of photovoltaic- and small-scale wind turbine-based technology.

c) Fifty per cent reimbursement for installation of photovoltaic or small-scale wind turbine

equipment that incorporate lithium-ion systems.
