

The Formentera Office of Social Welfare [*Conselleria de Benestar Social, CBSF*] is offering special training for technical staff of the office who are involved in foster care for at-risk minors. The two-day training was given by technicians of the Consell de Mallorca with more than twenty years of foster care experience.

To date, three local families have signed up to take part in the foster care service, which the Consell de Formentera brought on line last year. They will soon participate in training sessions and Consell personnel will assess their attitudes; staff will also accompany families through the first days of foster care. Islanders who are interested in participating in this service can call the CBSF at 971 321 271 or email benestarsocial@conselldeformentera.cat .
