

Formentera’s municipal services office reports that work began today to clean and clear brush from roadsides and upgrade and repave certain segments of highway. Crews will focus their efforts on the arterials that accommodate Ses Bardetes and the rubbish tip, not to mention Sant Ferran’s Camí de ses Vinyes, and a point along the road to Es Arenals. Islasfalto was brought in to carry out the approximately weeklong €43,000 effort.
